Funnel,

It looks like you just completed your Neurotoxicity Assessment and your score is: 24

Now that you have your score, commit it to memory then click on this link to learn what it means:

<https://results.pompaprogram.com/>

Once you land on that page, you're going to want to go straight to "Step 2" and type in your cellular inflammation score from your urine test.

If your test came back with no color, your score would be 0. If your test came back dark red, then your score would be a 7.

After that, you're going to want to type in your Neurotoxicity Assessment score of 24 into the second field.

From there, I'll explain in a brief video exactly what your results indicate.

Sincerely

Dr. Pompa
