Hey, it's Niklas and uhh how do I put this...

This email is a "friendly warning" to all the ecom fanbois.

Instagram just isn't for you. :-))

See that "very good-looking guy" wearing a white shirt on the right-most side of the pic?

That's me, showing everyone how difficult ECOM is.

When someone says that "*E-COMMERCE is beginner-friendly*" this is just a small reminder that you have to:

- Build shopify stores...
- Create ads...
- Write the copy...- Run the ads...
- Manage team members...

- Hire customer support people...

I don't know about you, but doing all that doesn't sound beginner-friendly to me at all.

Now instead of doing all that...

Why not just make 5-figs/mo postings quotes with background music on an Instagram account?

[Well that's what IGU 4.0 will show you what to do.](#)

When I started my very first theme page, all I did was post consistently.

You know what's happening today in all the theme pages that I own today?

Content is still being uploaded consistently.

In other words, nothing much changed at all.

1. To start a theme page - you just begin posting consistently.
2. To grow a theme page, you just keep posting consistently.
3. To make more money from the same theme page, you just keep posting consistently.

The truth is, running and owning a theme page is so simple...

People might even laugh at the idea of just "posting stuff" to make money with Instagram.

And I just don't blame you.

Even my clients Selina and Maribel who run @confidentlywomen laughed at the idea a year ago.

But now, they've made well over \$750k already.

This is the amount of money hiding on Instagram.

You see, I don't rent a Lambo, I actually own one.

I've hosted masterminds with Tai Lopez.

I've helped a broke plumber scale from \$30k - \$3.7 million per month.

I've also helped a teenager make \$500k before he turned 18...

And many more.

I'm not sharing this to "BRAG" about me and my student wins.

It's just necessary for me to share this stuff to let you know that all this craziness started with posting consistently.

And all that's being done to keep it going is to keep posting consistently.

So if you're an action taker...

And if you want to start your journey then it's time for you to separate yourself from the procrastinators :-)

As it stands today...

You have 2 days left to [TAP ON THIS link to make the IGU 4.0 yours](#) for just \$6.95.

If you don't use the link above...

You'll have to pay \$490 more to make the IGU 4.0 yours.

So a few things to remember on this email:

1. Ecommerce isn't as "beginner friendly" as it sounds.
2. To start, grow, and scale with Instagram theme pages, all you gotta do is one thing: post consistently.
3. You have 2 days left to make the IGU 4.0 yours for just \$6.95.

Hope this email was fun to read.

See you in the next one.
